Do you think that you absolutely have to reinstall your operating system after having lost your Windows password? Let me tell you the truth: You are absolutely wrong. There are couples of solutions that let you recover Windows XP password even administrator password. In this article, I list some methods on how to recover XP password, hope it can help you.

Method I: Recover Windows XP password in Safe Mode

Starting your computer in Windows XP Safe Mode can help you access to Windows XP if you <u>forgot Windows XP password</u>.

- 1. Restart your PC, and press the "F8" key before the Windows XP splash screen appears. The time is very short, you need to press it as quickly as possible and never miss. Otherwise, Windows XP is probably continuing to boot normally. And you have to restart your computer and press "F8" again.
- 2. You will enter "Advanced Boot Options". Using the arrow key on your keyboard to highlight "Safe Mode" Option and press "Enter".
- 3. The account logon screen appears, and you must log on with the administrator password. The default administrator password is blank unless you reset it.
- 4. Now your PC is in Safe Mode.
