

How to use Windows Password Recovery Enterprise?

Windows Password Recovery Enterprise 6.0 is an easy-to-use tool designed for resetting local administrator or domain administrator passwords on any Windows system. You only need to burn a bootable CD/DVD/USB and boot from CD/DVD/USB to reset your lost password. The following will show you a step-by-step guide to complete windows password reset tasks.

Step 1. Download and Install

1. Download a free demo version of *Windows Password Recovery Enterprise* 6.0 (The free demo version lists all the user names, but doesn't reset the passwords.).

2. Double-click on the file to install *Windows Password Recovery Enterprise* 6.0. You can install it on any PC you have access to, not necessarily on a computer you wish to unlock.

3. The installation process is quick. Upon successful completion of the installation, an installation successful screen will be displayed! Enable the "Run Windows Password Recovery Enterprise 6.0." check-box and click the "Finish" button. Windows Password Recovery Enterprise 6.0 will be launched automatically.

Step 2. Brun Windows Password Recovery Enterprise to CD/DVD/USB Flash Drive:

1. Choose the password recovery mode. Select "Reset Windows domain password".

	Status: Windows Password Recovery Enterprise 6.0 CD is ready in the driveG:

Step 3 . Reset your Windows password:

1. Insert newly created CD/DVD or USB Flash Drive to the computer that you lost its password and reboot it.

NOTE:

To reboot your PC with a CD/DVD disk, it's necessary to change your computer's setting to make it boot from the CD/DVD.

Click here To learn how to set BIOS to boot from the CD/DVD-ROM

To reboot your PC with a USB Flash Drive, It's necessary to change your computer's setting to make it boot from the USB Flash Drive. <u>Click here To learn how to set</u> <u>BIOS to boot from the USB Flash Drive</u>

2. When the CD/DVD boots, you'll see Windows Password Recovery Enterprise 6.0 is initializing (see screenshot below). If so, go on with the next step. If the computer still boots from Windows, it's necessary to change BIOS boot sequence to boot it from CD/DVD.

3. Choose the Windows installation to be processed:
